MARCIA HOFMANN ESQ
ELECTRONIC FRONTIER FOUNDATION
454 SHOTWELL STREET
SAN FRANCISCO, CA 94110

FOIPA No. 1058805-000

Subject: INVESTIGATIVE DATA WAREHOUSE

Dear Ms. Hofmann:

The enclosed documents were reviewed under the Freedom of Information/Privacy Acts (FOIPA), Title 5, United States Code, Section 552/552a. Deletions have been made to protect information which is exempt from disclosure, with the appropriate exemptions noted on the page next to the excision. In addition, a deleted page information sheet was inserted in the file to indicate where pages were withheld entirely. The exemptions used to withhold information are marked below and explained on the enclosed Form OPCA-16a:

- Section 552
- Section 552a

159 page(s) were reviewed and 159 page(s) are being released.

☐ Document(s) were located which originated with, or contained information concerning other Government agency(ies) [OGA]. This information has been:

☐ referred to the OGA for review and direct response to you.

☐ referred to the OGA for consultation. The FBI will correspond with you regarding this information when the consultation is finished.

☐ You have the right to appeal any denials in this release. Appeals should be directed in writing to the Director, Office of Information and Privacy, U.S. Department of Justice, 1425 New York Ave., NW, Suite 11050, Washington, D.C. 20530-0001 within sixty days from the date of this letter. The envelope and the letter should be clearly marked "Freedom of Information Appeal" or "Information Appeal." Please cite the FOIPA number assigned to your request so that it may be easily identified.

☐ The enclosed material is from the main investigative file(s) in which the subject(s) of your request was the focus of the investigation. Our search located additional references, in files relating to other individuals, or matters, which may or may not be about your subject(s). Our experience has shown, when ident, references usually contain information similar to the information processed in the main file(s). Because of our significant backlog, we have given priority to processing only the main investigative file(s).
If you want the references, you must submit a separate request for them in writing, and they will be reviewed at a later date, as time and resources permit.

See additional information which follows.

Sincerely yours,

David M. Hardy
Section Chief
Record/Information
Dissemination Section
Records Management Division

Enclosure(s)

The enclosed documents represent the fifth of a series of interim releases that will be made with regard to your request pertaining to the Investigative Data Warehouse.

For your information, some of the enclosed pages contain information about other subject matters. We consider this information “Outside the Scope” of your request, and have redacted the information and marked it as “Outside the Scope.”

The first page of this correspondence reflects that 159 pages were reviewed for this release. There were actually 8982 pages reviewed, however a further review determined that 8823 pages of this material are not responsive to the request.
EXPLANATION OF EXEMPTIONS

SUBSECTIONS OF TITLE 5, UNITED STATES CODE, SECTION 552

(b)(1) (A) specifically authorized under criteria established by an Executive order to be kept secret in the interest of national defense or foreign policy and (B) are in fact properly classified to such Executive order;

(b)(2) related solely to the internal personnel rules and practices of an agency;

(b)(3) specifically exempted from disclosure by statute (other than section 552b of this title), provided that such statute(A) requires that the matters be withheld from the public in such a manner as to leave no discretion on issue, or (B) establishes particular criteria for withholding or refers to particular types of matters to be withheld;

(b)(4) trade secrets and commercial or financial information obtained from a person and privileged or confidential;

(b)(5) inter-agency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency;

(b)(6) personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy;

(b)(7) records or information compiled for law enforcement purposes, but only to the extent that the production of such law enforcement records or information (A) could be reasonably expected to interfere with enforcement proceedings, (B) would deprive a person of a right to a fair trial or an impartial adjudication, (C) could be reasonably expected to constitute an unwarranted invasion of personal privacy, (D) could reasonably be expected to disclose the identity of confidential source, including a State, local, or foreign agency or authority or any private institution which furnished information on a confidential basis, and, in the case of record or information compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, information furnished by a confidential source, (E) would disclose techniques and procedures for law enforcement investigations or prosecutions, or would disclose guidelines for law enforcement investigations or prosecutions if such disclosure could reasonably be expected to risk circumvention of the law, or (F) could reasonably be expected to endanger the life or physical safety of any individual;

(b)(8) contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions; or

(b)(9) geological and geophysical information and data, including maps, concerning wells.

SUBSECTIONS OF TITLE 5, UNITED STATES CODE, SECTION 552a

(d)(5) information compiled in reasonable anticipation of a civil action proceeding;

(j)(2) material reporting investigative efforts pertaining to the enforcement of criminal law including efforts to prevent, control, or reduce crime or apprehend criminals;

(k)(1) information which is currently and properly classified pursuant to an Executive order in the interest of the national defense or foreign policy, for example, information involving intelligence sources or methods;

(k)(2) investigatory material compiled for law enforcement purposes, other than criminal, which did not result in loss of a right, benefit or privilege under Federal programs, or which would identify a source who furnished information pursuant to a promise that his/her identity would be held in confidence;

(k)(3) material maintained in connection with providing protective services to the President of the United States or any other individual pursuant to the authority of Title 18, United States Code, Section 3056;

(k)(4) required by statute to be maintained and used solely as statistical records;

(k)(5) investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment or for access to classified information, the disclosure of which would reveal the identity of the person who furnished information pursuant to a promise that his/her identity would be held in confidence;

(k)(6) testing or examination material used to determine individual qualifications for appointment or promotion in Federal Government service the release of which would compromise the testing or examination process;

(k)(7) material used to determine potential for promotion in the armed services, the disclosure of which would reveal the identity of the person who furnished the material pursuant to a promise that his/her identity would be held in confidence.

**Operational Subsystem Data Sources**

The data flow begins at the external data sources. These sources include various FBI databases including ACS, SAMNET, Intelplus and several others.
2.3.2 Special Projects Team (SPT) Subsystem

The Special Projects Team (SPT) Subsystem allows for the rapid import of new specialized data sources. These data sources are not made available to the general IDW users but instead are provided to a small group of users who have a demonstrated "need-to-know". The SPT System is similar in function to the IDW-S system, with the main difference is a different set of data sources. The SPT System allows its users to access not only the standard IDW Data Store but the specialized SPT Data Store.

The table below lists the data and sources for the SPT Subsystem.

Table 3.5.1 IDW-I Data Sets
IDW-S V1.0 Data Migration Plan

September 30, 2003
SCOPE V2.0/IDW V1.0 Data Sets

ACS ECF (CT Case Files):
- ASCII flat files (metadata and document text) and WordPerfect (document) binaries
- Data is synchronized once a day, which includes processing of adds, deletes, and modifications

Inteplus (CT Filerooms):
- Scanned TIFF images and OCR’ed ASCII text documents
- Data is synchronized once a week, which includes processing of adds, deletes, and modifications

SAMnet:
- ASCII files in standard cable traffic message format (all capitals with specific header)
- SAMNET data is provided/updated three times a day

JICI:
- Scanned TIFF images and OCR’ed ASCII text (pages)
- Static file system

VGTOF:
- ASCII flat files (data/metadata, one row per subject) and JPEG image binaries (none, one, or multiple per subject)
- At present, updated file being provided in its entirety on a weekly basis

Open Source:
- The Open Source Library is collected from global news sources that are either in English or have been translated into English
- The Open Source Library is updated once a day

Federal Bureau of Investigation (FBI),
Information Resources Division (IRD)
Investigative Data Warehouse (IDW) - Secret System Security Plan

INTRODUCTION

The Federal Bureau of Investigation's (FBI) Investigative Data Warehouse (IDW-S) is an initial data warehouse, content management and data mining system that will permit FBI investigative, analytical, administrative and intelligence personnel to access aggregated data previously only available through individual applications. The IDW-S system will be authorized to process classified national security data up to, and including, Secret. The IDW-S system is the successor of the Secure Counter-Terrorism/Collaboration Operational Prototype Environment (SCOPE†).

Data processed by the system will include the following data sets:

- Approved case files from the FBI’s Automated Case Support (ACS) case management system;
- Electronic versions of the Joint Intelligence Committee Investigation (JICI) defined archived documents;
- Secure Automated Messaging Network (SAMNet) message traffic;
- IntelPlus File Rooms; and
- Violent Gang and Terrorist Organization File (VGTOF) from the Criminal Justice Information Systems (CIJS) Division;
- Defense Advanced Research Projects Agency (DARPA) Translingual Information Detection, Extraction and Summarization (TIDES) Open Source Data

Outside the Scope
Data Sources

IDW-S contains data from the following data sources with security classification indicated in brackets:

- Automated Case Support (ACS) System, Electronic Case File (ECF) Subsystem [Secret and below]
- IntelPlus [Secret and below]
- Secure Automated Message Network – Secret (SAMNet-S) [Secret and below]
- NCIC Violent Gang and Terrorist Offender File (VGTOF) [Sensitive But Unclassified]
- Joint Intelligence Committee Investigation (JICI) [Secret and below]
- DARPA/TIDES Open Source News [Unclassified]

Data from each source is held in an identified source Library against which users can direct the analytical tools.

Data Ingest

IDW-S receives data from sources by FTP over FBINet (ACS, ECF, IntelPlus, and SAMNet) and CD-ROM (VGTOF, Open Source News).

- Data is received by the Ingest Subsystem
- Received data is parsed into individual serial records (in the case of ACS ECF), documents (IntelPlus, JICI, Open Source News), messages (SAMNet), or files (VGTOF).
3.5. **DATA PROCESSED**

IDW-S processes the following data:

### 3.5.1 ACS ECF

IDW-S contains a subset of the ECF (Electronic Case File) subsystem of the Automated Case System (ACS). This subset consists of serials in those case classifications/sub classifications that have been officially sanctioned for inclusion in IDW. For each such serial, the ECF data includes metadata and text. IDW-S is synchronized against the ECF system once a day, a process which consists of receiving and processing the previous day’s increment of ADD, MOD, and DELETE records.

### 3.5.2 IntelPlus

IDW-S currently contains several IntelPlus counter-terrorism (CT) Filerooms:

- 
- 

-22-

**UNCLASSIFIED // FOR OFFICIAL USE ONLY**
3.5.3 SAMNet

The Secure Automated Messaging Network (SAMNet) data source consists of cable traffic messages received by the FBI. SAMNet provides only ADD record types, and SAMNet data is updated in IDW-S three times a day. SAMNet data is

3.5.4 VGTOF

Violent Gang Terrorist Offender File (VGTOF) data is provided by the FBI National Crime Information Center (NCIC). VGTOF data includes two components: Data/metadata for each named individual/offender and potentially multiple JPEG images per individual.
3.5.5 JICI

The Joint Intelligence Committee Investigation (JICI) data collection was created following the September 11 attacks. Paper counter-terrorism files/folders from all FBI Field Offices is not updated.

JICI is a static collection that

3.5.6 Open Source News

The IDW-S V1.0 system contains an Open Source News library collected by the DARPA TIDES Program. These are primarily news source from around the world that are either in English or have been translated into English. Open Source News data is received in the form of text files (one per news article) and The Open Source News data goes into IDW-S once a day. Open Source News data is received in the form of text files (one per news article) and presented to users on a daily basis.

Open Source News material is derived from the following sources:

Investigative Data Warehouse-SECRET (IDW-S)

08 January 2004
Version: 0.9

ALL INFORMATION CONTAINED HEREFIN IS UNCLASSIFIED
DATE 01-07-2008 BY 65179 DHH/BJA/CAL

Federal Bureau of Investigation (FBI), Information Resources Division (IRD)
Investigative Data Warehouse (IDW) - Secret System Security Plan

INTRODUCTION

The Federal Bureau of Investigation’s (FBI) Investigative Data Warehouse Secret System (IDW-S) is an initial data warehouse, content management and data mining system that will permit FBI investigative, analytical, administrative and intelligence personnel to access aggregated data previously only available through individual applications. The IDW-S system will be authorized to process classified national security data up to, and including, Secret. The IDW-S system is the successor to the Secure Collaboration Operational Prototype Environment (SCOPE), which originally was named the Secure Counter-Terrorism Operational Prototype Environment.

Data processed by the system will include the following data sets:

- Approved case files from the FBI’s Automated Case Support (ACS) case management system;
- Electronic versions of the Joint Intelligence Committee Investigation (JICI) defined archived documents;
- Secure Automated Messaging Network (SAMNet) message traffic;
- IntelPlus File Rooms; and
- Violent Gang and Terrorist Organization File (VGTOF™) from the Criminal Justice Information Systems (CJIS) Division;
- Defense Advanced Research Projects Agency (DARPA) Translingual Information Detection, Extraction and Summarization (TIDES) Open Source Data
3.5. DATA PROCESSED

IDW-S processes data from the following data sources, with the security classification of the source indicated in brackets:

- Automated Case Support (ACS) System, Electronic Case File (ECF) Subsystem [Secret and below]
- IntelPlus [Secret and below]
- Secure Automated Message Network – Secret (SAMNet-S) [Secret and below]
- NCIC Violent Gang and Terrorist Offender File (VGTOF) [Sensitive But Unclassified]
- Joint Intelligence Committee Investigation (JICI) [Secret and below]
- DARPA/TIDES Open Source News [Unclassified]

Outside the Scope
### 3.5.1 ACS ECF

IDW-S contains a subset of the ECF (Electronic Case File) subsystem of the Automated Case System (ACS). This subset consists of serials in those case classifications/sub classifications that have been officially sanctioned for inclusion in IDW-S. For each such serial, the ECF data includes metadata and text. IDW-S is synchronized against the ECF system once a day, a process which consists of receiving and processing the previous day’s increment of ADD, MOD, and DELETE records.

### 3.5.2 IntelPlus

IDW-S currently contains several IntelPlus counter-terrorism (CT) Filerooms:

- b2
- b7E

---

UNCLASSIFIED // FOR OFFICIAL USE ONLY
3.5.3 SAMNet

The Secure Automated Messaging Network (SAMNet) data source consists of cable traffic messages received by the FBI SAMNet provides only ADD record types, and SAMNet data is updated in IDW-S three times a day. SAMNet.

3.5.4 VGTOF

Violent Gang Terrorist Offender File (VGTOF) data is provided by the FBI National Crime Information Center (NCIC). VGTOF data includes two components: Data/metadata for each named individual/offender and potentially multiple JPEG images per individual. The data/metadata for each individual.

3.5.5 JICI

The Joint Intelligence Committee Investigation (JICI) data collection was created following the September 11 attacks. Paper counter-terrorism files/folders from all FBI Field Offices.
3.5.6 Open Source News

The IDW-S V1.0 system contains an Open Source News library collected by the DARPA TIDES Program. These are primarily news sources from around the world that are either in English or have been translated into English. Open Source News data is received in the form of text files (one per news article) and the Open Source News data goes into IDW-S once a day. Open Source News data is a static collection that is not updated.
Open Source News material is derived from the following sources:

- Secure Automated Messaging Network (SAMNet) message traffic;
- IntelPlus File Rooms; and
- Violent Gang and Terrorist Organization File (VGTOF™) from the Criminal Justice Information Systems (CJIS) Division;
- Defense Advanced Research Projects Agency (DARPA) Translingual Information Detection, Extraction and Summarization (TIDES) Open Source Data

Outside the Scope
IDW-S contains data from the following data sources with security classification indicated in brackets:

Outside the Scope
Automated Case Support (ACS) System, Electronic Case File (ECF) Subsystem [Secret and below]
- IntelPlus [Secret and below]
- Secure Automated Message Network – Secret (SAMNet-S) [Secret and below]
- NCIC Violent Gang and Terrorist Offender File (VGTOF) [Sensitive But Unclassified]
- Joint Intelligence Committee Investigation (JICI) [Secret and below]
- DARPA/TIDES Open Source News [Unclassified]

Data from each source is held in an identified source Library against which users can direct the analytical tools.

Data Ingest

IDW-S receives data from sources by FTP over FBINet (ACS ECF, IntelPlus, and SAMNet) and CD-ROM (VGTOF, Open Source News).

- Received data is parsed into individual serial records (in the case of ACS ECF), documents (IntelPlus, JICI, Open Source News), messages (SAMNet), or files (VGTOF).
3.5. DATA PROCESSED

IDW-S processes the following data:

3.5.1 ACS ECF

IDW-S contains a subset of the ECF (Electronic Case File) subsystem of the Automated Case System (ACS). This subset consists of serials in those case classifications/sub classifications that
have been officially sanctioned for inclusion in IDW-S. For each such serial, the ECF data includes metadata and text. IDW-S is synchronized against the ECF system once a day, a process which consists of receiving and processing the previous day's increment of ADD, MOD, and DELETE records.

3.5.2 IntelPlus

IDW-S currently contains several IntelPlus counter-terrorism (CT) Filerooms:

3.5.3 SAMNet

The Secure Automated Messaging Network (SAMNet) data source consists of cable traffic messages received by the FBI.

SAMNet provides only ADD record types, and SAMNet data is updated in IDW-S three times a day. SAMNet data is
3.5.4 VGTOF
Violent Gang Terrorist Offender File (VGTOF) data is provided by the FBI National Crime Information Center (NCIC). VGTOF data includes two components: Data/metadata for each named individual/offender and potentially multiple JPEG images per individual.

3.5.5 JICI
The Joint Intelligence Committee Investigation (JICI) data collection was created following the September 11 attacks. Paper counter-terrorism files/folders from all FBI Field Offices.

JICI is a static collection that is not updated.

3.5.6 Open Source News
The IDW-S V1.0 system contains an Open Source News library collected by the DARPA TIDES Program. These are primarily news source from around the world that are either in English or have been translated into English. Investigative Data Warehouse
Maintenance Manual
Version 1.1 for Authority to Operate
June 11, 2004
1 Introduction
The Federal Bureau of Investigation (FBI) Integrated Data Warehouse (IDW) is a data warehouse, content management, and data mining system that will permit FBI investigative, analytical, administrative, and intelligence personnel to access aggregated data previously available only through individual applications. The IDW-S system will be authorized to process classified national security data up to, and including, the Secret level.

Data processed by the system will include the following data sets:

- Approved case files from the FBI's Automated Case Support (ACS) case management system;
- Electronic versions of the Joint Intelligence Committee Investigation (JICI) defined archived documents;
- Secure Automated Messaging Network (SAMNet) message traffic;
- IntelPlus File Rooms;
- Violent Gang and Terrorist Organization File (VGTOF) from the Criminal Justice Information Systems (CJIS) Division; and
- Open Source Data
